

NIZAMUDDIN

ALI AHMED

SENIOR MOBILE ENGINEER

Guwahati, Assam, India | +91 70026 01418
sallyinfo365@gmail.com | GitHub | Portfolio | Available immediately

ANDROID • FLUTTER

Kotlin | Dart | Jetpack Compose
Clean Architecture | AI / LLM

PROFILE

Senior Mobile Engineer with 6+ years of professional experience designing, developing, modernizing, and releasing production Android applications, with hands-on Flutter and Dart experience building cross-platform Android and Web applications. Strong expertise in Kotlin, Java, Jetpack Compose, Flutter, Clean Architecture, MVVM, modularization, Coroutines/Flow, performance optimization, reusable SDK development, REST integrations, and AI/LLM-backed mobile products. Experienced in technical ownership, legacy migration, code reviews, mentoring, CI/CD, and cross-functional delivery.

CORE EXPERTISE

MOBILE	Android SDK, Flutter, Jetpack Compose, Material 3, responsive cross-platform UI
LANGUAGES	Kotlin, Dart, Java, SQL
FLUTTER	Riverpod, Dio, GoRouter, feature-first Clean Architecture, Android/Web targets
ARCHITECTURE	MVVM, MVI, Clean Architecture, SOLID, modularization, multi-module and feature-first design
DATA & NETWORK	Retrofit, OkHttp, Dio, REST, JSON, GraphQL, Room, SQLite, Firebase, Supabase, Ktor
QUALITY	JUnit, MockK, Flutter testing, debugging, GitHub Actions, CI/CD, Android Profiler, Gradle

EXPERIENCE

VANTAGE CIRCLE

Senior Android Developer | Guwahati, India | Jul 2020 - May 2026

- Led migration of more than 60% of a legacy MVP codebase to MVVM, improving maintainability, separation of concerns, and developer onboarding.
- Migrated 25+ production screens from XML layouts to Jetpack Compose and introduced Material 3 components across multiple Android modules.
- Designed feature-based modular architecture for Classifieds and MyVouchers, enabling parallel development and clearer feature ownership.
- Diagnosed UI-thread and rendering bottlenecks with Android Profiler, improving frame stability and responsiveness on performance-sensitive screens.
- Implemented Kalman filtering for location and step detection and integrated ML Kit Pose Detection for real-time workout feedback.
- Migrated local persistence from SQLite to Room and contributed to Android 15 readiness including edge-to-edge UI, photo picker migration, and media-permission updates.
- Built and maintained integrations using Retrofit, OkHttp, Apollo GraphQL, Coroutines, Flow, Dagger 2, Firebase, and Android Jetpack components.
- Owned technical decisions, reviewed code, debugged production issues, and mentored engineers in Kotlin, Compose, architecture, and engineering practices.

GEEKWORKX TECHNOLOGIES

Web and App Developer | Guwahati, India | Jun 2018 - Jun 2020

- Developed and maintained location-based Android applications including Wify Cab and Ind Cab, and contributed to a web-based ERP platform.
- Integrated REST APIs and JSON services, resolved production defects, collaborated with backend/QA teams, and mentored junior developers and interns.

KBG SOFTWARE

Android Developer | Guwahati, India | Apr 2018 - Jun 2018

- Maintained Android applications for school clients, implemented features, fixed defects, and integrated REST APIs.

SELECTED PROJECTS

TAPORI AI	Android & Flutter AI Application 2025-2026 Built and released an LLM-backed conversational mobile product with contextual chat, authentication, credit handling, payments, Supabase Edge Functions, and production deployment. Migrated the native Android client to Flutter/Dart while preserving Clean Architecture boundaries and backend contracts; used Riverpod, Dio, GoRouter, and structured the client for Android and Web.
ARCHGUARD	Gradle Plugin & Developer Tool 2026 Designed an open-source Gradle plugin that converts Android architecture conventions into executable build rules. Built a Kotlin/Gradle DSL for required layers, feature-first structures, nested features, forbidden folders, validation, and HTML reporting.
SONICBRIDGE	Android TV & Mobile Audio Streaming 2026 Built Android TV transmitter and mobile receiver applications for low-latency local-network audio streaming using Kotlin, Jetpack Compose, AudioPlaybackCapture, WebSockets, 48 kHz PCM audio, AudioTrack playback, and automatic device discovery.
BIOMETRIC SDK	Reusable Android Authentication Library 2025 Developed a reusable lifecycle-aware Android authentication library around BiometricPrompt with a simplified integration API and consistent success, error, and cancellation handling.

TECHNICAL LEADERSHIP

- Developed reusable mobile SDKs, Gradle tooling, cross-platform Flutter work, and production applications spanning authentication, AI, real-time networking, and developer experience.
- Created GitHub Actions workflows for Android builds and delivery automation and worked with modular Gradle configurations across Android projects.
- Published technical articles on Android in-app updates, reusable biometric architecture, subtitle alignment, and Kotlin engineering concepts.
- Mentored developers through architecture migrations, Compose adoption, code reviews, debugging, and implementation planning.

EDUCATION

BACHELOR OF ENGINEERING - MECHANICAL ENGINEERING

Royal School of Engineering and Technology | 2013 - 2017

Academic projects: four-legged robot; virtual stress analysis of a bicycle frame.
