noncoderf.github.io/portfolio.github.io

CORE TECHNOLOGIES

React Native / TypeScript

JavaScript / React Hooks

Expo / Navigation / Camera

Kotlin / Java / Android

Jetpack Compose / MVVM

GraphQL / REST / Supabase

Coroutines / Flow / Hilt

Room / Retrofit / OkHttp

GitHub Actions / Testing

ENGINEERING FOCUS

Cross-platform mobile apps

Clean Architecture / SOLID

Performance and debugging

AI / computer vision

API integration / delivery

NIZAMUDDIN ALI AHMED

SENIOR REACT NATIVE ENGINEER

REACT NATIVE / TYPESCRIPT / ANDROID / GRAPHQL

PROFESSIONAL PROFILE

Mobile engineer with 6+ years of professional Android experience and React Native experience dating to 2020, including CRM application development at Geekworkx. Strong in mobile architecture, TypeScript, API integration, GraphQL, performance diagnostics and production delivery. Recently built an AI-powered OCR app using React Native, Expo and Supabase.

PROFESSIONAL EXPERIENCE

VANTAGE CIRCLE

Senior Android Developer | Jul 2020 - May 2026

- Modernized 60%+ of legacy MVP architecture to MVVM and migrated 25+ production screens to Jetpack Compose and Material 3.
- Designed modular features and integrated Apollo GraphQL, Retrofit/OkHttp, Room, Firebase, Coroutines/Flow and dependency injection.
- Built camera-based workout recognition with ML Kit pose landmarks, TensorFlow Lite and sensor/posture validation.
- Profiled rendering and runtime performance, improved location/activity processing, reviewed code and supported production releases.

GEEKWORKX TECHNOLOGIES

Web & App Developer | Jun 2018 - Jun 2020

- Used React Native in 2020 to develop CRM applications; gained hands-on experience with component-driven mobile UI and business workflows.
- Built and maintained location-based Android applications, integrated REST services and contributed to ERP functionality.

KBG SOFTWARE

Android Developer | Apr 2018 - Jun 2018

- Maintained Android applications for school clients, delivered features and integrated REST APIs.

CORE STRENGTHS

React Native since 2020

6+ years Android delivery

Architecture modernization

GraphQL / REST APIs

Camera / image workflows

AI-assisted mobile products

FEATURED REPOSITORY

PROJECTS & ENGINEERING

REACT NATIVE / PRODUCTION ANDROID / API SYSTEMS

FLAGSHIP REACT NATIVE PROJECT

AI-POWERED OCR | REACT NATIVE / TYPESCRIPT | 2026

- Built a camera-to-analysis mobile workflow using React Native and Expo, including captured-image gallery and image selection.
- Integrated a Supabase Edge Function for AI-based image understanding and structured results, including dynamic key-value details.
- Implemented React Native navigation, hooks, asynchronous API states, loading/error UI and interactive result presentation.

github.com/NonCoderF/Ocr

ADDITIONAL RELEVANT PROJECTS

DIGITAL ME | AI / SUPABASE

Conversational portfolio assistant with knowledge retrieval, focused context selection, LLM backend calls, streaming and request diagnostics.

FINDMYRECIPE | ANDROID / AI

Camera-based ingredient recognition and recipe discovery using Kotlin, Jetpack Compose, Hilt, Retrofit and Supabase Edge Functions.

TAPORI AI | MOBILE / BACKEND

AI chatbot with authentication, usage credits, payments and Supabase backend; includes a React Native client prototype.

TECHNICAL STRENGTHS ALIGNED TO THE ROLE

- Architecture: MVVM, Clean Architecture, modularization, SOLID, dependency injection and testable separation of concerns.
- Mobile delivery: debugging, profiling, code reviews, Android releases and GitHub Actions build automation.
- Networking: GraphQL with Apollo, REST APIs, asynchronous state management, authentication and backend integrations.

EDUCATION

B.E. - MECHANICAL ENGINEERING

Royal School of Engineering and Technology | 2013 - 2017
