PORTFOLIO

CORE SKILLS

Kotlin / Java

Jetpack Compose / XML

MVVM / Clean Architecture

Coroutines / Flow / Hilt

CameraX / ML Kit / TFLite

Retrofit / GraphQL / Room

Supabase / Firebase

React Native / TypeScript

Flutter / Dart

FOCUS

Mobile architecture

Computer vision

AI-backed products

Developer tooling

NIZAMUDDIN ALI AHMED

SENIOR MOBILE SOFTWARE ENGINEER

ANDROID / REACT NATIVE / AI & COMPUTER VISION

PROFESSIONAL PROFILE

Mobile Software Engineer with 6+ years of experience modernizing production Android applications. Strong in Kotlin, Jetpack Compose, MVVM/Clean Architecture, performance optimization, computer vision and reusable libraries. Independently builds and ships AI-powered products, developer tooling and cross-platform prototypes.

PROFESSIONAL EXPERIENCE

VANTAGE CIRCLE

Senior Android Developer | Jul 2020 - May 2026

- Migrated 60%+ of a legacy MVP codebase to MVVM, improving maintainability and developer onboarding; modernized 25+ screens with Jetpack Compose and Material 3.
- Built adaptive camera-based workout recognition: evolved pose-landmark cycle rules into TensorFlow Lite classification for squats, push-ups and jumping jacks.
- Added posture, lighting, device-orientation and sensor-assisted validation to reduce false detections and address replay-style misuse.
- Designed feature-based modules for Classifieds and MyVouchers, enabling clearer ownership and parallel development.
- Migrated SQLite to Room; integrated Retrofit/OkHttp, Apollo GraphQL, Coroutines/Flow, Dagger 2 and Firebase.
- Used Android Profiler to investigate rendering bottlenecks; applied Kalman filtering to location/activity signals and supported Android 15 edge-to-edge and media changes.
- Reviewed code, mentored engineers and contributed to production debugging and release readiness.

GEEKWORKX TECHNOLOGIES

Web & App Developer | Jun 2018 - Jun 2020

- Developed location-based Android apps including Wify Cab and Ind Cab; integrated REST services, contributed to web ERP features and resolved production issues.

KBG SOFTWARE

Android Developer | Apr 2018 - Jun 2018

- Maintained school-focused Android apps, delivered features, fixed defects and integrated REST APIs.

SELECTED ENGINEERING IMPACT

- Architecture modernization: migrated 60%+ of MVP code and 25+ production screens while supporting ongoing feature delivery.
- Computer vision: developed confidence-gated exercise recognition with posture checks, sensor validation and personalized movement analysis.
- Developer enablement: supported modularization, reviews, mentoring and reusable engineering practices.

PROJECTS & ENGINEERING

SHIPPED PRODUCTS / OPEN SOURCE / COMPUTER VISION

FindMyRecipe | 2026

Android ingredient-photo recipe discovery using Compose, Hilt, Retrofit, Supabase Edge Functions and AI vision.

GitHub **Google Play**

FormFit | 2026

Camera-based fitness tracking with ML Kit pose detection, TensorFlow Lite, exercise analysis and the Record & Repeat concept.

GitHub **Google Play**

Digital Me | 2026

Conversational portfolio assistant with keyword-based knowledge retrieval, focused LLM context and backend diagnostics.

Live portfolio

Tapori AI | 2025

Mumbai-style AI assistant with chat, authentication, credits, Razorpay payments and Supabase Edge Functions.

GitHub **Google Play**

ArchGuard | 2026

Gradle plugin and CLI for enforceable Android architecture rules, validation and reporting.

GitHub **Plugin portal**

SonicBridge | 2026

Android TV/mobile local-network audio streaming using AudioPlaybackCapture, WebSockets, PCM and AudioTrack.

Mobile repo **TV repo**

Biometric SDK | 2025

Reusable lifecycle-aware Android authentication library built around BiometricPrompt.

GitHub

ENGINEERING SPOTLIGHT

Adaptive exercise recognition: progressed from pose-landmark waveform/cycle detection to TFLite classification; added confidence gates, posture and lighting checks, device-sensor validation and a session-based personalization pipeline.

TECHNICAL LEADERSHIP & DELIVERY

- Created GitHub Actions workflows for Android build and delivery automation and worked with modular Gradle configurations.
- Published Android engineering articles and supported teams through architecture migration, Compose adoption and debugging.
- Built independently released mobile applications spanning conversational AI, computer vision, real-time networking and developer experience.

EDUCATION

B.E. - MECHANICAL ENGINEERING

Royal School of Engineering and Technology | 2013 - 2017

Academic work: four-legged robot; bicycle-frame stress analysis.
